

Hearing Aid Video Transcription

Hi I just want to share with you my experience regarding the hearing aids and what I have learned to see a new world around me, and to hear that new world. I'll share my experiences by saying I ignored my hearing loss through the years and just looked the other way. In the meantime I was punishing my wife on a daily basis with radio and television turned much too loud to the point where she would wear earplugs to save her hearing. Finally I decided to do something about it, I came here to see Steve and I have experienced life as I did not know it before. I hear sounds that I have not heard in years. Each time I've had to come in for any reason, Steve and the rest of the cast have been very kind and helpful to me. Honestly these hearing aids have changed my life and I'm grateful for what it's done for me and my wife would echo these thoughts. So I encourage you all if you're trying to make a decision on it, come in and get a test. Try one of these on, take a test drive with it, and you'll see what doors it can open for you.
